EXPERIENCE

Quant & FullStack Developer

Insiders.bot

November 2025 - June 2026, Remote

- Built a real-time Polymarket trading system by indexing Polygon (~10–20s faster than official APIs), executing via Telegram, with filtering for top wallets/markets and automated TP/SL + auto-redeem, driving \$1.32M+ in volume.

React Native Developer

Catoff gaming

June 2024 - October 2024, Bengaluru, India

- Worked on Shipping a web3 product, called as [catoff gaming](#). Worked with frontend and backend team to create the android app of Catoff gaming and their webapp. Helped them building the blinks for catoff which are always trending on. either x or dial.to page.

Fullstack Developer

Vignesh INC

February 2024 - May 2024, Mumbai, India

- Developed an Inventory Management System and ERP solution for clients and the organization.
- Collaborated closely with clients to understand their unique business requirements and deliver tailored solutions that align with their strategic objectives

FullStack WebDeveloper

Bullsshire Traders

November 2023, Mumbai, India

- Developed a web app on Figma and subsequently coding it using Next.js & Flask. live at: [Invesnow.in](#).

PROJECT

Lottos.wtf

- <https://lottos.wtf> A launchpad for on-chain lotteries, deployed on mainnet. Enables users to create and participate in transparent, provably fair lottery systems with real-time participation and payouts.

Viral City

- <https://viral-city.cityprotocol.co> Built an **AI UGC engine for viral content**, enabling users to generate, explore, and monetize short-form videos with on-chain reward mechanics for city protocol.

Nutrisnap

- <https://nutrisnap.xyz> This webapp has an user base of 20k+ users, 3 million+ views, we were onboarding 100+ new users every hour. Nutrisnap is a platform where we can scan our food, skin and body images and get data like calorie count, skin disease and skincare recommendations based on a finetuned ai model, NFTS based reputation system.

Cookchat.fun

- [Cookchat.fun](#) Token-gated chat platform for meme token communities, where access is restricted to users holding ≥ 0.1 SOL worth of the token, Designed to create holder-only discussions and reduce spam while aligning incentives within communities.

Totem

- <https://totem.cityprotocol.co> Built infra for **AI to 3D asset generation**, turning user images into collectible figurines with flows for minting, marketplaces, and physical 3D printing.

\$DBAS

- [\\$DBAS TOKEN SITE](#). A token on ETH but with innovative tokenomics ensure that every week the token supply is randomly reduced, sparking demand and driving prices upward. As a holder, you'll enjoy lucrative rewards, including insane APY just for staking.

PureBet

- [PureBet V2](#) Created a sports betting platform on solana, which is being currently used by a lot of users to actually place bets, using usdc or sol.
